Tree Location Sketch (approximate)

LOCATIONS APPROXIMATE, FOR FIELD REFERENCE ONLY. NOT A SURVEY.

Accuracy: Phone GPS is not survey grade: expect roughly 10-30 ft horizontal error (GPS.gov: smartphones are typically accurate to within 4.9 m / 16 ft under open sky, and accuracy worsens near buildings, bridges, and trees; https://www.gps.gov/gps-accuracy). The client's licensed surveyor locates the tags.
